Scotland

Anticipatory Care Matters: A video by Healthcare Improvement Scotland.

The video is a brief introduction to anticipatory care that was developed by Healthcare Improvement Scotland from the perspective of the care providers. [link]

Frequently Asked Questions about Anticipatory Care

The purpose of this guidance resource is to provide practical support to local teams about Anticipatory and Advance care planning (ACP), developed by the Scottish Government Improvement and Support Team. [link]

Alice and Jack’s Story in Anticipatory Care:

“Alice’s Story” is a teaching video resource and will help you gain insight into the Anticipatory Care Planning (ACP) journey. The film may help you understand some of the benefits to how ACP can help individuals and their carers to plan for their future care needs. [Alice’s video]

“Jack’s Story” is a real life story of an infant boy named Jack who had a life threatening condition from birth. His parents share their experience of anticipatory care which helped prepare them for Jack’s end of life. [Jack’s video]

Anticipatory Care Planning (ACP) and Integration: A primary Care Pilot Study Aimed at Reducing Hospitalization

This is a Scottish cohort study with the purpose of identifying a population who were at risk for admission to the hospital. ACP is used to ascertain whether using primary and secondary care data can identify and reduce hospital admission in this population. [link]

ACP initiatives in Scotland

A National Action Plan has been developed by a cross-sector, multi-agency group informed by the Many Conditions, One Life initiative (2014) to “increase the use of ACP, Carer Support Plans and Key Information Summaries.”. [link]

Canada
Cost-effectiveness of Anticipatory and Preventive multidisciplinary Team Care for complex patients
This study evaluated the cost-effectiveness of home-based care, for patients, aged over 50 years, with chronic coronary artery disease, diabetes, congestive heart failure, or chronic obstructive pulmonary disease. The authors concluded that the care programme did not seem to be cost-effective, but further long-term trials were needed.

The Views of Older Malaysians on Advanced Directive and Advanced Care Planning: A Qualitative Study
The provision of optimum care for the ageing population is dependent on the understanding of the views and values on end of life issues. A qualitative descriptive study was conducted to describe views of elderly Malaysians on Advanced Care Planning (henceforth ACP) and Advanced Directives (henceforth AD), and explore factors influencing these views.
