The session features experience of using the SCIROCCO tool from three European regions, the Basque Country, Norrbotten Region in Sweden and Puglia Region in Italy. Each Region tested the tool in the process of assessing the maturity of their healthcare systems for the adoption of integrated care.</p> | <p>Chaired by Dr Hector Upegui and Nicholas Cronshaw, IBM Watson Health</p> <p>IBM Watson Health is investing heavily to ensure the individual is supported through 'Integrated Care' and remains the absolute focus. A “win” for the individual needs to also be a “win” for the supporting organisations. Some of the obstacles in a successful strategy are: setting coordinated, integrated care plans based on relevant, effective evidence; coordination and communication amongst the person and a multi-disciplinary team; and establishing and maintaining person centricity. This session will provide IBM's point of view on integrated</p> |
