**Plenary 2: Use of Artificial Intelligence (AI) and digital tools in the people-centred integrated care**

**Live from Estonia**
Chaired by Leo Lewis, Director of Research, International Foundation for Integrated Care (IFIC) and a representative from Croatia

**Global innovation developments in healthcare and beyond**
Jens-Jakob Gustmann, Market Leader Health Systems at Philips Central & Eastern Europe

**How data and AI have become game changers in prediction-based, preventive, proactive interventions in healthcare**
Prof. Ran Balicer, Director, Innovation Division, Clalit Health Services & Founding Director, Clalit Research Institute

**Using Artificial Intelligence for Breast Cancer Screening**
Boris Brkljačić, President - European Society of Radiology

**A new age in digital innovation in primary and community care and support**
Representative from Estonia

**Beginner Session 3**

210 Effectiveness of appropriate care pathways for frail older adults: a pilot study in Valencia (Spain)

287 Integrated Care for Older Adults: a struggle for sustained implementation

327 Caring for older people living with frailty: a coaching and educational intervention for district nurses (DNs)

511 Social Medicine Initiative: Integrating health and social care from hospital to community

424 Digital connection to integrated health and social care services - Review of inter-sectoral cooperation of Health Care Center Zagreb and Rehabilitation Center Zagreb

531 Integrating data for integrated care - a guideline for data linkage in health services research and beyond

545 Data matters - no service integration without data integration: a transnational learning exercise

78 Towards a systematic identification of people with social complex needs: a pilot study on the use of the self-sufficiency matrix

432 “Zoom in” on Complex Patients – Risk Stratification Index for Identifying Patients Suitable for Integrative Model Intervention

304 Effect of GP visits post discharge on readmission risk

307 Informatics Here and Now to Support Efficient Integrated Care

326 Compassionate communities in Taipei, Taiwan - Building on integrated community engagement model for people-centered palliative care

367 High Five: creating compassion and mental well-being in young people in Scotland and Brazil

133 A compassionate communities’ programme to support volunteers to be carers at the end of life

64 Implementation of the Non-Acute Hospital Care in Slovenia

288 Population segmentation to inform new models of care in Oom Taf Mandagwuyi UHB

259 Lancashire and South Cumbria Integrated Care System: Our Population Health Management Journey. From Infrastructure and Intelligence to Interventions - 10% data, 90% culture and people.

436 Transforming Together: a Pathfinder for Integrated Care in Brazil

635 Evaluation of Complex Interventions in Hard to Serve Regions - Lessons Learned from a German Innovation Fund Project

199 Technology-enabled strategies for a fully integrated health system

94 Top managers’ views on health and social care integration – a qualitative study

235 A compassionate community in a hospital setting: a case study

123 Health and Social Care systems reaching out vulnerable populations with chronic conditions: Implementation results of the EU-project EFFICHRONIC

576 Advancing Integrated Models - emerging insights from a multi-site demonstration focused on implementing “next-generation” approaches to person-centered care for individuals with complex health and social needs. The workshop will describe exemplar models and explore challenges associated with these efforts, including incorporating community voice and addressing issues of power and discrimination

441 End-users involvement addressing issues of integrity and ownership of personal data in the development of an integrated ICT-based eHealth platform

251 Creating User Involving Cross-sectoral Collaborative Models. An action research project in patient care progress across sectors, involving citizens, health professionals, patients and relatives in the research process

368 ERF: promoting hospital care progression at the end of life

79 Patient information in care planning for patients with and for multimorbidity

199 A Practice-proven, Collaborative, Purity Meta-model-based Adaptive Case Management Approach for Integrated Care

285 Design of a Citizen Jury Model. Partnering with the Public for Governance of Artificial Intelligent Solutions for Integrated HealthCare

Networking Events

4.30pm – 5.30pm Central European Time

Implementing Science and Digital Solutions

DAY 2: Wednesday, 16th September

10.30am – 5.30pm Central European Time

#IFICinfo   #icic20   #integratedcare
