

Pallium Canada – Value Proposition

- In Canada, most health care professionals do not have basic palliative care competencies.
- Pallium has been developing palliative care capacity since 2000
- Pallium equips professionals and community with appropriate palliative care skills
- Focusing on only one sector at a time will not lead to culture change, system preparedness and building system capacity
- Supporting the Compassionate Communities theory of practice will widen the circle of care.

Pallium Canada – Empowering Communities

Pallium's tools and resources to support community champions:

- Startup Toolkit
- Compassionate Workplace Campaign
- Compassionate Communities Exchange
